+ Jonathan and Karen

Diana and Cindy now both have access to the sharepoint compliance report folder.

I requested permission to look at the site. I'm also a registered CEDRI reviewer, so I can probably look at this and provide feedback. Are you wanting to exclude annual reports for just well pads? I have found that some companies report all facilities lumped in together. The reports can be very large, and sometimes there may be gathering sites and other facilities mixed in with well pads. Diana

Hi Cindy and Diana,

Rob suggested that you two are best suited to help the Oil and Gas Technical reconsideration workgroup do some "culling" of the electronic compliance reports. We are hoping to glean some information regarding fugitive emissions from them. Amy

Hambrick might need to give you permission to access the sharepoint site.

Ex. 5 Deliberative Process (DP)

You will find a download of the submitted OOOOa reports to CEDRI. Please highlight the ones in your region that look like well sites. This will help cull the list and we can then create a smaller list of reports which we need to download to further scope.

In the file on sharepoint there is also one well site report so you have an idea of what it looks like - there are tabs for each type of affected facility.

Ex. 5 Deliberative Process (DP)

Thanks in advance!

Subject: Regional data review request

On today's call, you mentioned asking the regions to review a spreadsheet and cite the well sites. Have you asked Cindy Kaleri or Diana Lundelius to do that review? I can't locate the request in my email and they would be the more informed individuals to provide the information.
